Pearson Edexcel International GCSE (9–1)

Thursday 25 May 2023

Morning (Time: 2 hours)

Paper
reference

4PH1/1P 4SD0/1P

Physics

UNIT: 4PH1

Science (Double Award) 4SD0

PAPER: 1P

You must have:

Ruler, calculator, Equation Booklet (enclosed)

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- Show all the steps in any calculations and state the units.

Information

- The total mark for this paper is 110.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Write your answers neatly and in good English.
- Try to answer every question.
- Check your answers if you have time at the end.

FORMULAE

You may find the following formulae useful.

energy transferred = current \times voltage \times time

$$E = I \times V \times t$$

$$\text{frequency} = \frac{1}{\text{time period}}$$

$$f = \frac{1}{T}$$

$$\text{power} = \frac{\text{work done}}{\text{time taken}}$$

$$P = \frac{W}{t}$$

$$\text{power} = \frac{\text{energy transferred}}{\text{time taken}}$$

$$P = \frac{W}{t}$$

$$\text{orbital speed} = \frac{2\pi \times \text{orbital radius}}{\text{time period}}$$

$$v = \frac{2 \times \pi \times r}{T}$$

(final speed)² = (initial speed)² + (2 \times acceleration \times distance moved)

$$v^2 = u^2 + (2 \times a \times s)$$

pressure \times volume = constant

$$p_1 \times V_1 = p_2 \times V_2$$

$$\frac{\text{pressure}}{\text{temperature}} = \text{constant}$$

$$\frac{p_1}{T_1} = \frac{p_2}{T_2}$$

Where necessary, assume the acceleration of free fall, $g = 10 \text{ m/s}^2$.

BLANK PAGE

Answer ALL questions.

Some questions must be answered with a cross . If you change your mind about an answer, put a line through the box and then mark your new answer with a cross .

1 This is a question about radioactivity.

(a) Which of these is the unit of activity?

(1)

- A becquerel
- B kilogram
- C newton
- D pascal

(b) Which of these is the correct description of the term **half-life**?

(1)

- A time taken for the activity of a substance to halve
- B half of the time taken for the mass of a substance to decay
- C time taken for the activity to decay completely
- D time taken for the mass of a substance to decay twice

(c) A teacher demonstrates how the activity of a radioactive sample changes with time.

(i) The box gives the names of different pieces of equipment.

ruler	stopwatch	balance	newton meter
protractor	GM tube	voltmeter	ammeter

Complete the sentences using words from the box.

(2)

The teacher measures time with a

The teacher measures the count rate with a and a counter.

(ii) The graph shows the teacher's results.

Draw a circle around the anomalous result.

(1)

(iii) Use the graph to determine the half-life of the radioactive sample.

(2)

half-life = s

(iv) Give a reason why the teacher should not expect the data points to lie exactly on the curve of best fit.

3 A family has a television set.

(a) The television set has a low power mode called standby.

When on standby, the power rating of the television set is 0.27W.

Calculate the energy transferred to the television set on standby in 12 hours.

(3)

energy transferred = J

(b) In normal use, the current in the television set is 0.31 A.

(i) Explain how a fuse works to protect the television set if there is a fault.

(3)

.....

.....

.....

.....

.....

.....

(ii) Explain why a 13 A fuse is not an appropriate choice of fuse to use in the plug of this television set.

4 Ground-penetrating radar (GPR) uses radio waves to detect changes in material underground.

(a) (i) State the formula linking the speed, frequency and wavelength of a wave. (1)

(ii) GPR radio waves have a frequency of 170 MHz.

The speed of radio waves is 3.0×10^8 m/s.

Calculate the wavelength of the waves. (3)

wavelength = m

(b) (i) A radio wave passes through the ground and refracts at the boundary between soil and rock.

The diagram shows three wavefronts of the wave before and after refraction.

The wave is also reflected at the boundary between the soil and the rock.

Complete the diagram to show three wavefronts after the wave has been reflected at the boundary. (3)

- 9 A manometer is a device that can be used to measure the pressure difference between gas from a gas tap and the atmosphere.

When a gas tap is connected to the manometer, the liquid in the manometer moves due to the additional pressure of the gas.

- (a) The pressure difference is linked to the difference in height of the two surfaces of the liquid by the formula

$$\text{pressure difference} = \text{density} \times g \times \text{height difference}$$

The height difference between the two surfaces is 0.094 m.

Calculate the pressure difference between the gas from the gas tap and the atmosphere.

[for liquid, density = 14 000 kg / m³]

(2)

pressure difference = Pa

BLANK PAGE

10 A student investigates how the time taken for a ball to roll down a slope changes with the distance from the bottom of the slope.

This is the student's method.

- place a ball on the slope 10 cm from the bottom of the slope
 - release the ball and start a stopwatch
 - stop the stopwatch when the ball arrives at the bottom of the slope
 - record the time taken for the ball to roll down the slope
 - repeat for different distances from the bottom of the slope
- (a) Complete the table by placing a tick (✓) to show which variables are the independent, dependent and control variables in this investigation.

(4)

	Independent	Dependent	Control
Surface of slope			
Angle of slope			
Distance travelled			
Time taken			

(b) The table shows the student's results.

Distance travelled in cm	Time taken in s
10	0.41
20	0.58
30	0.71
40	0.82
50	0.91

(i) Plot the student's data on the grid.

(1)

(ii) Draw a best fit curve.

(1)

(iii) The student concludes that the results obey this relationship

$$\text{distance} \div (\text{time}^2) = \text{constant}$$

Use the student's data to deduce whether the student's results support this conclusion.

Pearson

These equations may be required for both International GCSE Physics (4PH1) and International GCSE Combined Science (4SD0) papers.

1. Forces and Motion

$$\text{average speed} = \frac{\text{distance moved}}{\text{time taken}}$$

$$\text{acceleration} = \frac{\text{change in velocity}}{\text{time taken}} \quad a = \frac{(v-u)}{t}$$

$$(\text{final speed})^2 = (\text{initial speed})^2 + (2 \times \text{acceleration} \times \text{distance moved})$$

$$v^2 = u^2 + (2 \times a \times s)$$

$$\text{force} = \text{mass} \times \text{acceleration} \quad F = m \times a$$

$$\text{weight} = \text{mass} \times \text{gravitational field strength} \quad W = m \times g$$

2. Electricity

$$\text{power} = \text{current} \times \text{voltage} \quad P = I \times V$$

$$\text{energy transferred} = \text{current} \times \text{voltage} \times \text{time} \quad E = I \times V \times t$$

$$\text{voltage} = \text{current} \times \text{resistance} \quad V = I \times R$$

$$\text{charge} = \text{current} \times \text{time} \quad Q = I \times t$$

$$\text{energy transferred} = \text{charge} \times \text{voltage} \quad E = Q \times V$$

3. Waves

$$\text{wave speed} = \text{frequency} \times \text{wavelength} \quad v = f \times \lambda$$

$$\text{frequency} = \frac{1}{\text{time period}} \quad f = \frac{1}{T}$$

$$\text{refractive index} = \frac{\sin(\text{angle of incidence})}{\sin(\text{angle of refraction})} \quad n = \frac{\sin i}{\sin r}$$

$$\sin(\text{critical angle}) = \frac{1}{\text{refractive index}} \quad \sin c = \frac{1}{n}$$

4. Energy resources and energy transfers

$$\text{efficiency} = \frac{\text{useful energy output}}{\text{total energy output}} \times 100\%$$

$$\text{work done} = \text{force} \times \text{distance moved} \quad W = F \times d$$

$$\text{gravitational potential energy} = \text{mass} \times \text{gravitational field strength} \times \text{height}$$

$$GPE = m \times g \times h$$

$$\text{kinetic energy} = \frac{1}{2} \times \text{mass} \times \text{speed}^2$$

$$KE = \frac{1}{2} \times m \times v^2$$

$$\text{power} = \frac{\text{work done}}{\text{time taken}}$$

$$P = \frac{W}{t}$$

5. Solids, liquids and gases

$$\text{density} = \frac{\text{mass}}{\text{volume}}$$

$$\rho = \frac{m}{V}$$

$$\text{pressure} = \frac{\text{force}}{\text{area}}$$

$$p = \frac{F}{A}$$

$$\text{pressure difference} = \text{height} \times \text{density} \times \text{gravitational field strength}$$

$$p = h \times \rho \times g$$

$$\frac{\text{pressure}}{\text{temperature}} = \text{constant}$$

$$\frac{p_1}{T_1} = \frac{p_2}{T_2}$$

$$\text{pressure} \times \text{volume} = \text{constant}$$

$$p_1 \times V_1 = p_2 \times V_2$$

8. Astrophysics

$$\text{orbital speed} = \frac{2 \times \pi \times \text{orbital radius}}{\text{time period}}$$

$$v = \frac{2 \times \pi \times r}{T}$$

The equations on the following page will only be required for International GCSE Physics.

These additional equations may be required in International GCSE Physics papers 2P and 2PR.

1. Forces and Motion

momentum = mass \times velocity $p = m \times v$

force = $\frac{\text{change in momentum}}{\text{time taken}}$ $F = \frac{(mv - mu)}{t}$

moment = force \times perpendicular distance from the pivot

5. Solids, liquids and gases

change in thermal energy = mass \times specific heat capacity \times change in temperature

$$\Delta Q = m \times c \times \Delta T$$

6. Magnetism and electromagnetism

relationship between input and output voltages for a transformer

$$\frac{\text{input (primary) voltage}}{\text{output (secondary) voltage}} = \frac{\text{primary turns}}{\text{secondary turns}}$$

input power = output power

$$V_p I_p = V_s I_s$$

for 100% efficiency

8. Astrophysics

$\frac{\text{change in wavelength}}{\text{reference wavelength}} = \frac{\text{velocity of a galaxy}}{\text{speed of light}}$ $\frac{\lambda - \lambda_0}{\lambda_0} = \frac{\Delta \lambda}{\lambda_0} = \frac{v}{c}$

END OF EQUATION LIST
